

FOR IMMEDIATE RELEASE:

Wilkes-Barre City Employees Federal Credit Union Selects CAMS-ii Core Processing Solution

Dublin, Ohio-November 10, 2014- When Joe Gimble received his recent appointment as CEO of the \$40 million Wilkes-Barre City Employees FCU in Wilkes-Barre-PA, he knew one thing he wanted to bring along, the CAMS-ii Core Processing Solution. And he did. The 2285 member Credit Union will convert to CAMS-ii, provided by R. C. Olmstead, Inc. (RCO) of Dublin, OH in mid-2015.

When his prior credit union knew they needed to upgrade their core system to add more member facing features, Mr. Gimble was a major part of that decision. They decided staying with RCO with whom they worked for many years was the best path including moving to the CAMS-ii Core Processing Solution.

Mr. Gimble states, "CAMS-ii provides all the tools we need to grow our Credit Union, no need for a lot of outside sourcing for the services our members want and need. I know the RCO staff will work with us so we are ready handle the new system day one."

Besides using the core processing system from CAMS-ii, Wilkes-Barre City Employees FCU will be utilizing Home Banking, mobile banking applications, home document signatures, e-alerts, real-time ATM/Debit card processing and Check 21 service at the teller line.

Gimble continued "I am confident we are moving in the right direction for our members. The exciting part is that we will now have so many new ways for them to access their credit union needs and with RCO we were able to do it at price structure we could easily manage."

About Wilkes-Barre City Employees Federal Credit Union

Wilkes-Barre City Employees Federal Credit Union was founded in 1960 in Wilkes-Barre, Pennsylvania and has grown to have assets over \$40 million. They offer financial services to multiple groups, but primarily serve the federal, state, and local government sector.
